ABOUT ME

Data Scientist with a background in engineering and hands-on experience in machine learning, AI automation, and business intelligence. Builds predictive models (churn, demand forecasting, NLP), explainable ML with SHAP, and AI agents, and turns results into dashboards in Power BI and Tableau for non-technical stakeholders. Experienced in international, remote teams, working in Portuguese, English, and Italian.

WORK EXPERIENCE

AI Assistant – AI Agents & Process Automation *05/2024 – 07/2025*
Self-employed, remote

- Supported clients in designing and building AI agents for micro-tools across WhatsApp, customer experience (CX) support, email, and project workflows.
- Automated administrative workflows and document generation using Python and AI tools, reducing manual effort and increasing operational efficiency.
- Led the migration of operational processes to ClickUp, structuring project management systems with improved task visibility and tracking.
- Analyzed business processes to identify bottlenecks and improvement opportunities, supporting data-driven decisions.

Tech Support – Community Education Specialist*07/2022 – 03/2024*
Foundever™, Porto, Portugal

- Performed root cause analysis of support tickets using Genesys Service Cloud, identifying recurring patterns and proposing resolution improvements.
- Managed 30+ inquiries per day while maintaining a 95% customer satisfaction rate (CSAT), tracking key performance indicators.
- Reduced repeat contacts through structured troubleshooting, improving first-contact resolution rate.

Freelance Designer*01/2020 – 02/2022*
Self-employed

- Built interactive dashboards to visualize project data, including feasibility studies, budget analysis, and energy consumption metrics.
- Translated complex datasets into clear insights for non-technical stakeholders, supporting decision-making.

Civil Engineering Team Coordination*07/2017 – 05/2019*
Corrêa Engenharia, Rio de Janeiro, Brazil

- Built analytical models using DAX for trend identification and decision support.
- Integrated data from multiple sources and developed interactive dashboards for financial and operational analysis.
- Coordinated multidisciplinary teams, ensuring data quality and on-time delivery.

Operational Civil Engineering Intern*05/2013 – 12/2016*
Senac Brasil · Cury Construtora, Rio de Janeiro, Brazil

- Developed operational and financial reports in spreadsheets to identify inefficiencies and support budget planning.
- Built budget spreadsheets and BI dashboards for competitor benchmarking and financial decision support.

EDUCATION AND TRAINING

Specialization in Data Analysis, IT *06/2025 – 06/2026*
Universidade Anhanguera São Paulo, Brazil

Master of Engineering (MEng), Civil Engineering Technology *2021 – 2023*
Instituto Politécnico de Viana do Castelo, Portugal

Bachelor's Degree in Civil Engineering *2012 – 2017*
Pontifícia Universidade Católica do Rio de Janeiro, Brazil

LANGUAGE SKILLS

Mother tongue: Portuguese

Other languages	Overall level (CEFR)
English	C1
Italian	B2
Spanish	B2

DIGITAL SKILLS

Programming & data: Python (Pandas, NumPy, Scikit-learn), SQL, R, Git, GitHub

Machine learning: supervised learning, classification, regression, time-series forecasting, feature engineering, NLP / sentiment analysis

AI & LLMs: AI agents, LLM-based automation, prompt engineering, Anthropic API, RAG fundamentals, LangChain / LlamaIndex, vector databases (Chroma)

BI & visualization: Power BI, DAX, Power Query, Tableau, Advanced Excel (Pivot Tables, VLOOKUP)

Analysis & modeling: data cleaning, ETL, data modeling, statistical analysis, A/B testing, KPI analysis, forecasting, process automation

Tools: ClickUp, GitHub Pages, Revit

PROJECTS

Data Science Portfolio — karinenoronha.github.io

- Customer Churn Prediction: classification model -based explainability to identify the drivers of churn.
- Demand Forecasting: time-series forecasting, from stationarity checks to model validation.
- Multilingual NLP Sentiment Analysis: text classification across Portuguese, English, and Italian.
