

Karine Noronha

Junior Data Analyst | SQL • Power BI • Python • Excel

karinepnoronha@gmail.com | linkedin.com/in/karinenoronha | github.com/karinenoronha | Italy | +39 350 575 5441

PROFESSIONAL SUMMARY

Data Analyst in training, focused on turning data into clear insights that support business decisions. Hands-on experience with SQL, Power BI and Python to extract, clean, analyze and visualize data, with a focus on building dashboards and reports that help different business areas spot trends and act on data. Multicultural profile, fluent in four languages, comfortable working across international teams and markets. Currently seeking a Junior Data Analyst / BI position.

TECHNICAL SKILLS

SQL • Power BI • Python • Advanced Excel • DAX • Data Modeling • KPI Analysis • Dashboards • Business Intelligence • Process Automation

LANGUAGES

Portuguese (Native) • English (Full Professional) • Italian (Professional Working) • Spanish (Professional Working)

PROFESSIONAL EXPERIENCE

Virtual AssistantMay 2024 – Jun 2025

Self-employed — Remote

- Automated administrative workflows and document generation using Python, reducing manual effort and increasing operational efficiency.
- Led the migration of operational processes to ClickUp, structuring project management systems with improved task visibility and tracking.
- Analyzed business processes to identify bottlenecks and improvement opportunities, supporting data-driven decisions.

Tech Support – Community Education SpecialistJul 2022 – Mar 2024

Foundever™ — Porto, Portugal

- Performed root cause analysis of support tickets using Genesys Service Cloud, identifying recurring patterns and proposing resolution improvements.
- Managed 30+ inquiries per day while maintaining a 95% customer satisfaction rate (CSAT), tracking key performance indicators.
- Reduced repeat contacts through structured troubleshooting, improving first-contact resolution rate.

Freelance DesignerJan 2020 – Feb 2022

Self-employed

- Built interactive dashboards to visualize project data, including feasibility studies, budget analysis and energy consumption metrics.
- Translated complex datasets into clear insights for non-technical stakeholders, supporting decision-making.

Civil Engineering Team CoordinationJul 2017 – May 2019

Noronha Corrêa Engenharia — Rio de Janeiro, Brazil

- Built analytical models using DAX for trend identification, forecasting and decision support.
- Integrated data from multiple sources and developed interactive dashboards for financial and operational analysis.
- Coordinated multidisciplinary teams, ensuring data quality and on-time delivery.

Operational Civi Engineering InternMay 2013 – Dec 2016

Senac Brasil • Cury Construtora — Rio de Janeiro, Brazil

- Developed operational and financial reports in spreadsheets to identify inefficiencies and support budget planning.
- Built budget spreadsheets and BI dashboards for competitor benchmarking and financial decision support.
